## USER INTERFACE

## EMPlus 600

### KEYS

#### UP

##### Press and release

Scroll menu items  
Increases values

#### STAND-BY (ESC)

##### Press and release

Returns to the previous menu level  
Confirms parameter value  
**Press for at least 5 sec**  
Activates the Standby function (OFF)

#### DOWN

##### Press and release

Scroll menu items  
Decrease values

#### SET (ENTER)

##### Press and release

Displays alarms (if active)  
Opens Machine Status menu  
Confirm commands  
**Press for at least 5 sec**  
Opens Programming menu

## ICONS

<p>● <b>Decimal Point</b>            Permanently on: decimal point            Off: otherwise</p>	<p>° <b>Temperature</b>            Permanently on: displays a temperature            Off: otherwise</p>
<p><b>P</b> <b>Pressure</b>            Permanently on: displays a pressure            Off: otherwise</p>	<p><b>H</b> <b>Humidity</b>            Permanently on: displays a humidity            Off: otherwise</p>
<p><b>1</b> <b>Not Used</b></p>	<p><b>2</b> <b>Not Used</b></p>
<p>⚠ <b>Alarm</b>            Permanently on: alarm active            Flashing: alarm acknowledged            Off: otherwise</p>	<p><b>NOTE:</b>            When switched on, the device performs a Lamp Test; the display and LEDs will flash for several seconds to check that they all function correctly.</p>

## TELEVIS SYSTEM

The Televis remote control systems can be connected using the TTL serial port (TTL-RS485 **BusAdapter** 130 or 150 interface module must be used).

To configure the instrument to do this, you need to access the **Add** folder and use the **dEA** and **FAA** parameters.

## NTC/PTC MODEL

### CONNECTIONS

### INPUT/OUTPUT CHARACTERISTICS

Display range	<b>NTC:</b> -50...110°C (-58...230°F) <b>PTC:</b> -50...140°C (-58...302°F) on display with 3½ digits + sign
Analogue input	1 <b>NTC</b> or 1 <b>PTC</b> (selectable by parameter <b>H00</b> )
Serial	TTL for connection to Copy Card or Televis/Modbus remote control systems
Measurement range	-50 ... 140°C (-58 ... 284°F)
Accuracy	better than 0.5% of end of scale +1 digit
Resolution	0.1°C (0.1°F up to +199.9°F; 1°F over)

### TERMINALS

<b>*4-5</b>	Power supply 230V~.	<b>10-11</b>	Probe Pb1 Input
<b>*8-9</b>	Power supply 12V~/~ and 12-24V~/12-36V~.		
<b>A</b>	TTL input for Copy Card and TelevisSystem connection	<b>* depends on model</b>	

## V/I MODEL

### CONNECTIONS

V/I (12V~/~)

V/I (230V~)

### INPUT/OUTPUT CHARACTERISTICS

Display range	-199...199 (ndt = <b>n</b> ) -199.9...199.9 (ndt = <b>y</b> ) -1999...1999 (ndt = <b>int</b> ) on display with 3½ digits + sign
Analogue input	1 <b>V/I</b> (0-1V, 0-5V, 0-10V, 0...20mA, 4...20mA) (selectable by parameter <b>H00</b> ) Maximum load: - current = 100 Ω - voltage = 20 kΩ
Serial	TTL for connection to Copy Card or Televi/Modbus remote control systems
Measurement range	-1999 ... 1999
Accuracy	Depends on model: <b>0-1V</b> : better than 1% of e.o.s. +1 digit <b>other</b> : better than 0.5% of e.o.s. +1 digit
Resolution	1 or 0.1 digit according to settings

### TERMINALS

<b>*6-7</b>	Power supply 230V~.	<b>*9-10-12</b>	Voltage input ( <b>9</b> =GND; <b>10</b> ="+"; <b>12</b> =12V)
<b>*7-8</b>	Power supply 12V~/~.	<b>*9-11-12</b>	Current input ( <b>9</b> =GND; <b>11</b> ="+"; <b>12</b> =12V)
<b>A</b>	TTL input for Copy Card and TeleviSystem connection		<b>* depends on model</b>

# PT100/Tcj-Tck MODEL

## CONNECTIONS

## INPUT/OUTPUT CHARACTERISTICS

Display range	<b>PT100:</b> -150...650°C <b>TcJ:</b> -40...750°C <b>TcK:</b> -40...1350°C on display with 3½ digits + sign
Analogue input	1 <b>PT100</b> or 1 <b>TcJ / Tck</b> (selectable by parameter <b>H00</b> )
Serial	TTL for connection to Copy Card or Televis/Modbus remote control systems
Measurement range	-150 ... 1350°C (-238 ... 2462°F)
Accuracy	see 'Pt100/TcJ/TcK models' table
Resolution	see 'Pt100/TcJ/TcK models' table

## TERMINALS

<b>*5-6</b>	Power supply 230V~.	<b>*10-11-12</b>	Probe <b>PT100</b> input - 3 wires (Pb1)
<b>*6-7</b>	Power supply 12V~/ and 12-24V~/12-36V~.	<b>*11-12</b>	<b>TcJ/TcK</b> input
<b>A</b>	TTL input for Copy Card and TelevisSystem connection		<b>* depends on model</b>

## PT100/Tcj-Tck MODELS

<b>PT100:</b>	ACCURACY:	0.5% for whole scale + 1 digit 0.2% from -150 to 300°C
	RESOLUTION:	0.1°C (0.1°F) from -199.9°C up to 199.9°C; 1°C (1°F) beyond
<b>Tcj:</b>	ACCURACY:	0.4% for whole scale + 1 digit
	RESOLUTION:	0.1°C (0.1°F) from -199.9°C up to 199.9°C; 1°C (1°F) beyond
<b>Tck:</b>	ACCURACY:	0.5% for whole scale + 1 digit 0.3% from -40 to 800°C
	RESOLUTION:	0.1°C (0,1°F) from -199.9°C up to 199.9°C; 1°C (1°F) beyond

## MOUNTING - DIMENSIONS

The device is designed for panel mounting. Drill a 29x71 mm hole and insert the instrument; secure it with the special brackets provided. Do not install the instrument in damp and/or dirty places; in fact, it is suitable for use in places with ordinary or normal levels of pollution. Keep the area around the instrument cooling slots adequately ventilated.

## EWPA-EWHS PROBE CONFIGURATION

### ● EWHS 284 2 wires

### ● EWHS 304/314 3 wires

### ● EWPA 007/030 2 wires / Transducer

### ● EWHS 314 4 wires (V-I model)

## USING THE COPY CARD

The Copy Card is connected to the serial port (TTL) and allows rapid programming of the instrument parameters. Access **Installer** parameters by entering 'PA2', scroll through the folders using  and  until folder **FPr** appears. Select it using , scroll through the parameters using  and , then select the function using  (eg. **UL**).

- **Upload (UL):** select **UL** and press . This function uploads the programming parameters from the instrument to the card. If the procedure is a success, 'y' will appear on the display, otherwise 'n' will appear.
- **Format (Fr):** select **Fr** and press . This function is used to format the copy card (recommended when using the card for the first time).

**Important:** the **Fr** parameter deletes all data present. This operation cannot be cancelled.

- **Download (dL):**
  - select **dL** and press . This function downloads the programming parameters from the card to the instrument. If the procedure is a success, 'y' will appear on the display, otherwise 'n' will appear.
  - Connect the Copy Card when the instrument is switched off. At power-on, data is downloaded from the copy card to the instrument automatically. At the end of the lamp test, the display will show '**dLy**' if the operation was successful and '**dLn**' if not.

**NOTE:** After downloading, the instrument works with the settings of the new map just downloaded.

## ACCESSING AND USING THE MENUS

The resources are organized into 2 menus which are accessed as follows:

- 'Machine Status' menu: press and release the **SET** key.
- 'Programming' menu: hold down the **SET** key for 5 seconds.

Either do not press any keys for 15 seconds (timeout) or press the **ⓘ** key once, to confirm the last value displayed and return to the previous screen.

## PASSWORD

**Password 'PA1'**: used to access **User** parameters. The password is not enabled by default (**PS1=0**).

To enable it (**PS1≠0**): press and hold **SET** for longer than 5 seconds, scroll through the parameters using **⏪** and **⏩** until you see the label **PS1**, press **SET** to display the value, modify it using **⏪** and **⏩**, then save it by pressing **SET** or **ⓘ**. If enabled, it will be required in order to access the User parameters.

**Password 'PA2'**: used to access **Installer** parameters. The password is enabled by default (**PS2=15**).

To modify it (**PS2≠15**): press and hold **SET** for longer than 5 seconds, scroll through the parameters using **⏪** and **⏩** until you see the label **PA2**, press **SET**, set the value to '15' using **⏪** and **⏩**, then confirm using **SET**. Scroll through the folders until you find the label **diS** and press **SET** to enter. Scroll through the parameters using **⏪** and **⏩** until you see the label **PS2**, press **SET** to display the value, modify it using **⏪** and **⏩**, then save it by pressing **SET** or **ⓘ**.

The visibility of **'PA2'** is as follows:

- 1) **PA1** and **PA2 ≠ 0**: Press and hold **SET** for longer than 5 seconds to display **PA1** and **PA2**. It will then be possible to decide whether to access the 'User' parameters (**PA1**) or the 'Installer' parameters (**PA2**).
- 2) **Otherwise**: The password **PA2** is amongst the level1 parameters. If enabled, it will be required when accessing the Installer parameters; to enter it, proceed as instructed for password **PA1**.

If the value entered is incorrect, the label **PA1/PA2** will be displayed again and the procedure will need to be repeated.

## MACHINE STATUS MENU

Access the Machine Status menu by pressing **SET** and releasing the key. Use the keys **⏪** and **⏩** to scroll through all the folders in the menu:

- **AL**: alarms folder (only visible if an alarm is active);

- **Pb1**: probe 1 - Pb1 folder;

**Displaying probes:** when label Pb1 is present, press the **SET** key to view the value measured by the corresponding probe (**NOTE**: the value cannot be modified).

## PROGRAMMING MENU

To access the 'Programming' menu, press the **SET** key for more than 5 seconds. If specified, an access PASSWORD will be requested: 'PA1' for User parameters and 'PA2' for Installer parameters (see 'PASSWORD' paragraph).

**User Parameter:** When accessed, the display will show the first parameter (e.g. 'HAL').

Press **⏪** and **⏩** to scroll through all the parameters on the current level. Select the desired parameter by pressing **SET**. Press **⏪** and **⏩** to modify it and **SET** to save the changes.

**Installer Parameter:** When accessed, the display will show the first folder (e.g. 'AL').

Press **⏪** and **⏩** to scroll through the folders on the current level. Select the desired folder using **SET**. Press **⏪** and **⏩** to scroll through the parameters in the current folder and select the parameter using **SET**. Press **⏪** and **⏩** to modify it and **SET** to save the changes.

**NOTE:** Switch the instrument off and on again each time the parameter configuration is changed.

## DIAGNOSTICS

Alarms are always indicated by the alarm icon .

To switch off the alarm, press and release any key; the corresponding icon will continue to flash.

**NOTE:** If alarm exclusion times have been set (see 'AL' folder in the parameters table) the alarm will not be signalled.

## ALARMS

Label	Fault	Description	Effects	Remedy
<b>E1</b>	Probe1 faulty	<ul style="list-style-type: none"> <li>measured values are outside operating range</li> <li>Probe faulty/short-circuited/open</li> </ul>	<ul style="list-style-type: none"> <li>Display label <b>E1</b></li> <li>Alarm icon permanently on</li> <li>Disable max/min alarm controller</li> </ul>	<ul style="list-style-type: none"> <li>check probe type (<b>H00</b>)</li> <li>check probe wiring</li> <li>replace probe</li> </ul>
<b>AH1</b>	Alarm for HIGH value (Pb1)	value read by <b>Pb1</b> $\geq$ <b>HAL</b> after time of <b>tAO</b> . (see "MAX/MIN TEMPERATURE ALARMS")	<ul style="list-style-type: none"> <li>Recording of label <b>AH1</b> in folder AL</li> <li>Alarm icon permanently on</li> </ul>	Wait until value read by Pb1 returns below <b>HAL-AFd</b> .
<b>AL1</b>	Alarm for LOW value (Pb1)	value read by <b>Pb1</b> $\leq$ <b>LAL</b> after time of <b>tAO</b> . (see "MAX/MIN TEMPERATURE ALARMS")	<ul style="list-style-type: none"> <li>Recording of label <b>AL1</b> in folder AL</li> <li>Alarm icon permanently on</li> </ul>	Wait until value read by Pb1 returns above <b>LAL+AFd</b> .

## MAX/MIN TEMPERATURE ALARM

- Minimum temperature alarm: Temp.  $\leq$  **LAL** (LAL with sign)
- Maximum temperature alarm: Temp.  $\geq$  **HAL** (HAL with sign)
- Returning from min temp. alarm: Temp.  $\geq$  **LAL + AFd**
- Returning from max temp. alarm: Temp.  $\leq$  **HAL - AFd**

## TECHNICAL DATA (EN 60730-2-9)

Classification:	operation (not safety) device for incorporation
Mounting:	panel mounting with 71x29 mm (+0.2/-0.1 mm) drilling template
Type of action:	1.B
Pollution class:	2
Material class:	IIIa
Overvoltage category:	II
Rated impulse voltage:	2500V
Temperature:	Operating: -5 ... +55 °C - Storage: -30 ... +85 °C
Power supply:	<ul style="list-style-type: none"><li>• 12V~/∞ (±10%)</li><li>• 12-24V~/12-36V∞ ±10% (dedicated power supply not grounded or earth connected)</li><li>• 230V~ ±10% 50/60 Hz</li></ul>
Consumption:	<ul style="list-style-type: none"><li>• 1.5 VA max (model 12V~/∞)</li><li>• 3 W max (models: 24V~, 12-24V~/12-36V∞, 115V~ and 230V~)</li></ul>
Fire resistance category:	D
Software class:	A

**NOTE:** check the power supply specified on the instrument label.

## FURTHER INFORMATION

### Input/Output Characteristics

See 'Connections' section

### Mechanical Characteristics

Casing:	PC+ABS UL94 V-0 resin casing, polycarbonate window, thermoplastic resin keys
Dimensions:	front panel 74x32 mm, depth 59 mm (without terminals)
Terminals:	screw/disconnectable terminals for cables with a diameter of 2,5mm <sup>2</sup>
Connectors:	TTL for connection of Unicard/Copy Card
Humidity:	Operating / Storage: 10...90 % RH (non-condensing)

### Regulations

Food Safety:

The device complies with standard EN13485 as follows:

- suitable for storage
- application: air
- climate range A
- measurement class 1 in the range from -25°C to 15°C (\*)

**(\* exclusively using Eliwell probes)**

**NOTE:** The technical specifications given in this document regarding measurement (range, accuracy, resolution, etc.) refer to the instrument and not to any accessories provided, such as the probes. This means, for example, that the error introduced by the probe must be added to the typical error of the instrument.

## PARAMETERS TABLE

PAR.	DESCRIPTION	MODEL	RANGE	VALUE	U.M.	LEVEL
ALARMS (folder 'AL')						
<b>HAL</b>	Maximum temperature alarm.	<b>NTC/PTC</b>	LAL...150.0	50.0	°C/°F	User/Inst
		<b>PT100-Tc</b>	LAL...1999	1200	°C/°F	
		<b>V/I</b>	LAL...150	150	num	
<b>LAL</b>	Minimum temperature alarm.	<b>NTC/PTC</b>	-150.0...HAL	-50.0	°C/°F	User/Inst
		<b>PT100-Tc</b>	-328...HAL	-199,9	°C/°F	
		<b>V/I</b>	-150...HAL	-150	num	
<b>AFd</b>	Alarm differential.	<b>NTC/PTC</b>	1.0...50.0	2.0	°C/°F	Inst

## ELECTRICAL CONNECTIONS

**Attention! Make sure the machine is switched off before working on the electrical connections.**

The instrument is equipped with screw or disconnectable terminal blocks for connecting electrical cables with a max. diameter of 2,5mm<sup>2</sup>.

Make sure the power supply voltage complies with that required by the instrument.

NTC/PTC/PT100 probes have no connection polarity and can be extended using a normal bipolar cable (Note that extending the probes burdens the behaviour of the instrument in terms of EMC electromagnetic compatibility: specifically, if Pt100 probes with cable longer than 3 mt are used, an extreme care must be taken during wiring operations).

## CONDITIONS OF USE

### **Permitted use**

For safety reasons, the instrument must be installed and used according to the instructions supplied and, in particular, parts under dangerous voltages must not be accessible in normal conditions.

The device must be adequately protected from water and dust with regard to its application, and must only be accessible using tools (except for the front panel). The device is suitable for use in household refrigeration appliances and/or similar equipment and has been tested for safety aspects in accordance with the harmonised European reference standards.

### **Improper use**

Any use other than that expressly permitted is prohibited. The relay contacts provided are of a functional type and subject to failure: any protection devices required by product standards, or suggested by common sense for obvious safety requirements, must be installed externally to the instrument.

## LIABILITY AND RESIDUAL RISKS

ELIWELL CONTROLS SRL declines any liability for damage due to:

- installation/uses different from those specified and, in particular, not complying with the safety regulations and/or instructions given in this document;
- use on panels that do not provide adequate protection against electric shocks, water or dust when assembled;
- use on panels allowing access to dangerous parts without the use of tools;
- tampering with and/or modifying the product;
- installation/use on panels not complying with current standards and regulations.

## DISCLAIMER

This document is the exclusive property of ELIWELL CONTROLS SRL and may not be reproduced or circulated unless expressly authorised by ELIWELL CONTROLS SRL itself. Every care has been taken in preparing this document; nevertheless ELIWELL CONTROLS SRL cannot accept liability for any damage resulting from its use. The same applies to any person or company involved in preparing and editing this document. ELIWELL CONTROLS SRL reserves the right to make aesthetic or functional changes at any time without notice.

## DISPOSAL

The appliance (or the product) must be disposed of separately in compliance with the local standards in force on waste disposal.
